Delivery Status by Shipping Mode

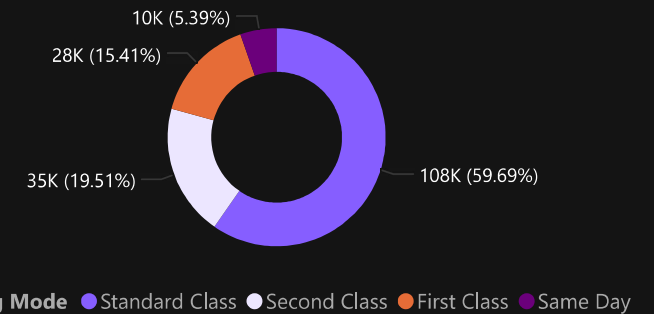

Delivery Status: Advance shipping (blue), Late delivery (orange), Shipping canceled (green), Shipping on time (red)

Key Insights

- Standard Class handles almost maximum number of all the total shipments.
- Late delivery is the most common status across all shipping modes. Even premium modes like First Class and Same Day show high late delivery rates, reflecting that the issue is operational rather than shipping-mode specific.
- On-time rate of 42.7% indicates more than half of the orders are not delivered on time, it indicates a room for improvement.
- Same Day shipping has the lowest volume at 5.4% likely due to higher cost but it still faces problems of late delivery.
